Knitwear is a timeless fashion staple that can be dressed up or down to suit any occasion. In recent years, there has been a growing trend towards textured knitwear, as designers explore new ways to create interest and depth in their garments.

Texture can be created in knitwear through a variety of techniques, including the use of different yarns, stitches, and patterns. In this article, we will explore some of the most popular texture trends for 2020 and provide tips on how to incorporate them into your own knitting projects.

## Yarn Choice

The type of yarn you choose will have a significant impact on the texture of your garment. For textured knitwear, look for yarns with interesting textures, such as slub yarns, bouclé yarns, or novelty yarns.

- **Slub yarns** have small, uneven nubs that create a textured surface.
- **Bouclé yarns** are made from loops of yarn, which create a fluffy, textured effect.
- **Novelty yarns** are yarns that have been treated with special processes to create unique textures, such as metallic yarns, ribbon yarns, or eyelash yarns.

## Stitch Choice

The stitch you choose will also affect the texture of your garment. Some stitches, such as the garter stitch, create a smooth, even surface, while other stitches, such as the seed stitch, create a more textured surface.

- **Garter stitch** is a simple stitch that creates a flat, even surface.
- **Seed stitch** is a variation of the garter stitch that creates a textured surface with small bumps.
- **Moss stitch** is a stitch that creates a textured surface with small, evenly spaced holes.
- **Cable stitch** is a stitch that creates a raised, textured pattern.

## Pattern Choice

The pattern you choose will also affect the texture of your garment. Some patterns, such as simple stripes, create a subtle texture, while other patterns, such as lace patterns, create a more complex texture.

- **Stripes** are a simple and effective way to add texture to a garment.
- **Lace patterns** create a delicate and feminine texture.

- **Cable patterns** create a bold and masculine texture.
- **Intarsia patterns** create a textured surface with different colors of yarn.

## Tips for Incorporating Texture into Your Knit Projects

- **Use a variety of yarns.** Combining different yarns with different textures can create a unique and interesting look.
- **Experiment with different stitches.** Different stitches can create different textures, so don't be afraid to experiment until you find the look you want.
- **Use patterns to your advantage.** Patterns can be used to create texture, so use them to your advantage to add interest to your garments.
- **Don't be afraid to mix and match.** You can mix and match different yarns, stitches, and patterns to create your own unique textured knitwear.

Texture is a great way to add interest and depth to your knitwear. By experimenting with different yarns, stitches, and patterns, you can create timeless garments that will be cherished for years to come.
